

## ENVIRONMENTAL AND SUSTAINABILITY COMMUNICATION TO OUR SUPPLIERS

Dear Supplier,

This document aims to share our environmental protection policy and our commitment to sustainability. Tiesse S.p.A. operates a management system compliant with the **UNI EN ISO 14001** and **UNI EN ISO 9001** standards. This environmental system is designed to identify and assess all environmental aspects stemming from our activities, also contributing to promoting a more sustainable business model.

Tiesse S.p.A. requires its suppliers to:

- Comply with legal and contractual requirements;
- Ensure the integrity, health, and safety of workers;
- Safeguard the environment;
- Commit to adopting the same principles in managing day-to-day operations;
- Maintain equipment regularly and ensure it complies with applicable road safety regulations to prevent spills of liquids, lubricants, and fuels in company yards, as well as emissions exceeding permitted limits. Vehicles parked in the company yards must switch off their engines.

In line with our sustainability values, Tiesse S.p.A. recommends, where applicable, the following environmental best practices:

- Plan regulatory and environmental compliance activities at least annually;
- Systematically identify, assess, and control the general environmental impacts of project activities, paying special attention to:
  - Internal and external noise
  - Special waste
  - Use of chemicals harmful to humans and the environment
  - Use of natural and energy resources
  - Atmospheric emissions
  - Discharge of wastewater
  - Packaging used for goods transport
  - Induced vehicular traffic
- Identify potential environmental disturbances caused by activities to eliminate their causes;
- Adopt technologically advanced equipment and systems to contain/reduce environmental impacts;
- Pursue continuous improvement in preventing and limiting the environmental impacts of project activities;
- Promote awareness and environmental responsibility among employees through training and information initiatives;
- Integrate principles of environmental, social, and economic sustainability into decision-making and operational processes.

Additionally, Tiesse S.p.A. encourages its suppliers to consider adopting sustainability-oriented initiatives, such as:

**Sede Legale e Operativa:**

Via Asti, 4 - 10015 Ivrea (TO) - Italy

Capitale Sociale € 1.050.000 i.v.

Partita IVA, Codice fiscale e R.I.: 07437130011

- Reducing carbon emissions during production, transport, and distribution phases;
- Using recycled or recyclable materials and reducing the use of plastics;
- Increasing energy efficiency and using renewable energy sources;
- Promoting circular economy practices in product life cycles.

Acceptance of our order implies agreement with the above principles and a commitment from the supplier to conduct their activities with respect for the environment and a long-term sustainable vision.

A copy of this communication and the Quality and Environmental Policy is available on the company website [www.tiesse.com](http://www.tiesse.com).

Tiesse S.p.A. thanks you for your collaboration and the attention you devote to environmental and sustainability issues.

**Ivrea, 10/12/2024**

The Management of Tiesse S.p.A.  
Dr. Fabrizia Montefiori
